

EK400 – WR

The entry control device EK400 WR is a combination of the entry control device EK 400 and a touch-free hand wash basin with automatic soap dispenser. The unit is also equipped with a folded paper towel dispenser and paper towel waste basket.

The automatic soap dispenser mixes liquid soap with the water for the first two seconds, this is followed by 7 seconds of clear water. The aforementioned time periods are adjustable. Alternatively, a sensor-controlled faucet for liquid soap is also available. Both, the automatic soap admixture as well as the sensor-controlled soap dispensing ensure a force-guided and hygienic hand washing available. Only when the hands have been washed with soap and disinfected does the turnstile unlock.

Option

- Pedestal for floor mounting
- Mounted on the left or right side
