

SORM-H

The sole cleaning machine SORM-H is designed for smaller businesses in the food processing industry, and comes wired ready for connection to any 230 V socket. A horizontally mounted rotating brush which is covered by a stainless steel bracket ensures easy cleaning of the soles of shoes and boots.

The brush is activated by a button on the handle which simultaneously adds the cleaning agent and water mixture.

The cleaning agent concentration is determinable by the use of the different sized nozzles, included in delivery. Siphons, joints and gaskets and small parts are not included.
