

Boot Cleaning Machine STRM

The boot cleaning machine STRM serves to clean both the boot soles and boot legs. The one horizontally mounted brush and the two standing brushes are activated by a stainless steel button on the handle, which simultaneously releases the cleaning agent and water mixture.

The concentration of the cleaning agent can be controlled by the nozzle that comes in adjustable sizes (included in delivery). The brushes are easy to wash and can be removed without the use of tools.

The machine is sensor operated.

Siphon, joints and gaskets and small parts are not included.

Technical data	STRM
Dimensions (WxDxH)	860 x 750 x 1150 mm
Electrical connection	400 V/N/PE, 50/60 Hz
Power consumption	0,75 kW
Water connection	3/4" max. 43 °C
Water outlet	DN 50
